Experiences

February 2023 - Currently

Sekera – Frontend Engineer

- Developed landing pages in close collaboration with our UI/UX designer for our various SaaS products using technologies: HTML/CSS/Next.js, and TailwindCSS.
- Contributed to the development of the new version of the SecDojo platform (a gamified cybersecurity learning and recruitment platform. It offers a complete learning path and is suited for both businesses and universities.) in 6 months using technologies: Angular/TypeScript, and TailwindCSS.

August 2021 - February 2023

Digital Partnership – Fullstack Developer

- Contributed to building harx.ai (a platform that connects traders and companies to sell services and products and earn commissions on sales.)
- Contributed to building Animo.ma (an intermediary between buyers, sellers, and people wishing adopt pets.).
- Developed web applications with javascript (React.js/svelte.js)
- Design and implementation of databases using UML/Merise
- Contributed to implementing features, fixing bugs, and refactoring code of an internal platform used to manage the workflow of the scrum team inside the company built with laravel
- Worked on integrating different APIs to some of the current web apps (Zoom/google calendar/google drive...)
- Helped on Improving code quality of existing projects
- Often times I work on the backend, mostly tasks related to auth & CRUD
- Participation in daily scrum meetings with the scrum team

July 2020 - November 2020

Digital Partnership – Internship

- Developed user interfaces using HTML/CSS (Flex-box,gride system)
- Développé user interfaces of a CRM of Burger King using React.js
